Peace of Mind

Though the contractor is responsible for dealing with all claims, should he cease to trade the insurance becomes active and the Insurance Company will then deal with any claims under the contractor's guarantee. Should this happen, a simple e-mail or telephone call will connect you to our knowledgeable and sympathetic staff.

At Smith damp proofing ltd we are extremely proud to say we have never had any failed jobs, but it is because we take extreme pride in our work and reputation. It is important that every job is carried out with the upmost amount of respect, to check absolutely every aspect of the work before, during and after. And always leave the jobs clean and tidy. By doing this and always putting our customers first we have grown in to a well-established and respected company.

"Damp proofing is an area where advice and price are variable. Jake explained everything well and the price was very competitive. The workmen treated my house with respect and did not leave until everything was 100% complete and we were happy. The company went that extra mile to provide with us with a great service which is rare with trades these days. I would absolutely recommend Jake and his company. I have never used Checkatrade before and was apprehensive at first. However, will use again."

"Had damp problems for a while and found Smith damp proofing ltd. Arranged an appointment for a quote. Jake Smith discussed damp plus rendering on outside wall. We stressed at the time the importance of our neighbors decking not being damaged, Jake assured us this would be done. Rear room was completely protected and was the decking. Work was carried out by Jakes team to a very high standard which included repointing the outside wall before rendering. Once work was completed room was thoroughly cleaned as was the decking. We have know hesitation in recommending Jake and his team."

"When you employ workmen for the first time there is always a bit of anxiety - will they do a good job, will they charge more than they quoted, and will they leave a mess? I needn't have worried at all! Jake and his colleague, worked diligently throughout, cleaned up as they went (my kitchen floor was mopped daily!) and were respectful of my home. Jake worked in a calm and methodical way and was always happy to explain what the job entailed and how things were going. I would have no hesitation in recommending him to other customers."
